059-532-0299    Accra, Ghana

**Professional Summary**

A skilled Back-End Web Developer with expertise in building robust and scalable server-side applications. Proficient in Node.js, Express.js, and databases such as MongoDB and MySQL. Although my primary focus is back-end development, I also possess foundational knowledge of front-end technologies, including HTML, CSS, and JavaScript. Adept at problem-solving and providing technical support, I am eager to contribute my skills to a growing team while further enhancing my back-end development expertise.

**Experience**

**Marketing support consultancy Ltd** – Achimota, Accra| I.T Assistance| 11/2022 – Present

**Duties**

- **Technical Support:** Assisted employees with troubleshooting hardware, software, and network issues.
- **System Maintenance**: Monitored and maintained computer systems, ensuring smooth operation and regular updates.
- **Installation and Setup**: Installed and configured hardware, software, printers, and other IT equipment for new and existing users.
- **User Account Management**: Managed user accounts, including setting up new accounts, resetting passwords, and managing permissions.
- **Network Support**: Assisted in maintaining the company's network infrastructure, including routers, switches, and firewalls.
- **Data Backup and Recovery**: Helped with regular data backups and performed recovery operations in case of data loss.
- **IT Inventory Management**: Maintained an up-to-date inventory of IT equipment and software licenses.
- **Security Compliance**: Ensured that all systems were compliant with the company's security protocols and performed regular checks for potential vulnerabilities.
- **Training and Documentation**: Provided basic IT training to staff and documented IT procedures for future reference.
- **Software Updates**: Assisted with the deployment of software updates and patches across company systems.

**Technical skills**

- **Back-End Development**: Node.js, Express.js
- **Databases**: MongoDB, MySQL (Basic)

- **API Development**: RESTful APIs, JSON, Postman
- **Version Control**: Git, GitHub
- **Authentication**: JWT, OAuth)
- **Front-End (Basic)**: HTML5, CSS3, JavaScript, tailwind
- **Cloud Services**: AWS
- **Development Tools**: VS Code
- **Server Management**: Basic Linux commands

## Soft skills

- **Innovative Problem-Solver**: Known for identifying creative and efficient solutions to complex technical challenges, ensuring optimal functionality of web applications and systems.
- **Adaptable and Quick Learner**: Thrive in dynamic environments, quickly adapting to new technologies, tools, and frameworks to meet evolving business needs.
- **Effective Communicator**: Able to break down complex technical concepts into clear, actionable insights for both technical and non-technical stakeholders, fostering seamless collaboration.
- **Detail-Oriented**: Consistently deliver high-quality, error-free work by paying close attention to every aspect of development, from coding to user experience.
- **Collaborative Team Player**: Demonstrated ability to work cross-functionally with front-end developers, designers, and other stakeholders to build seamless, end-to-end solutions.
- **Self-Motivated & Goal-Driven**: Passionate about continuous learning and professional growth, regularly setting and achieving goals that contribute to personal development and team success.
- **Resilient Under Pressure**: Maintain focus and deliver results even in high-pressure situations, ensuring deadlines are met without compromising on quality.
